

WHAT IS SHADING?

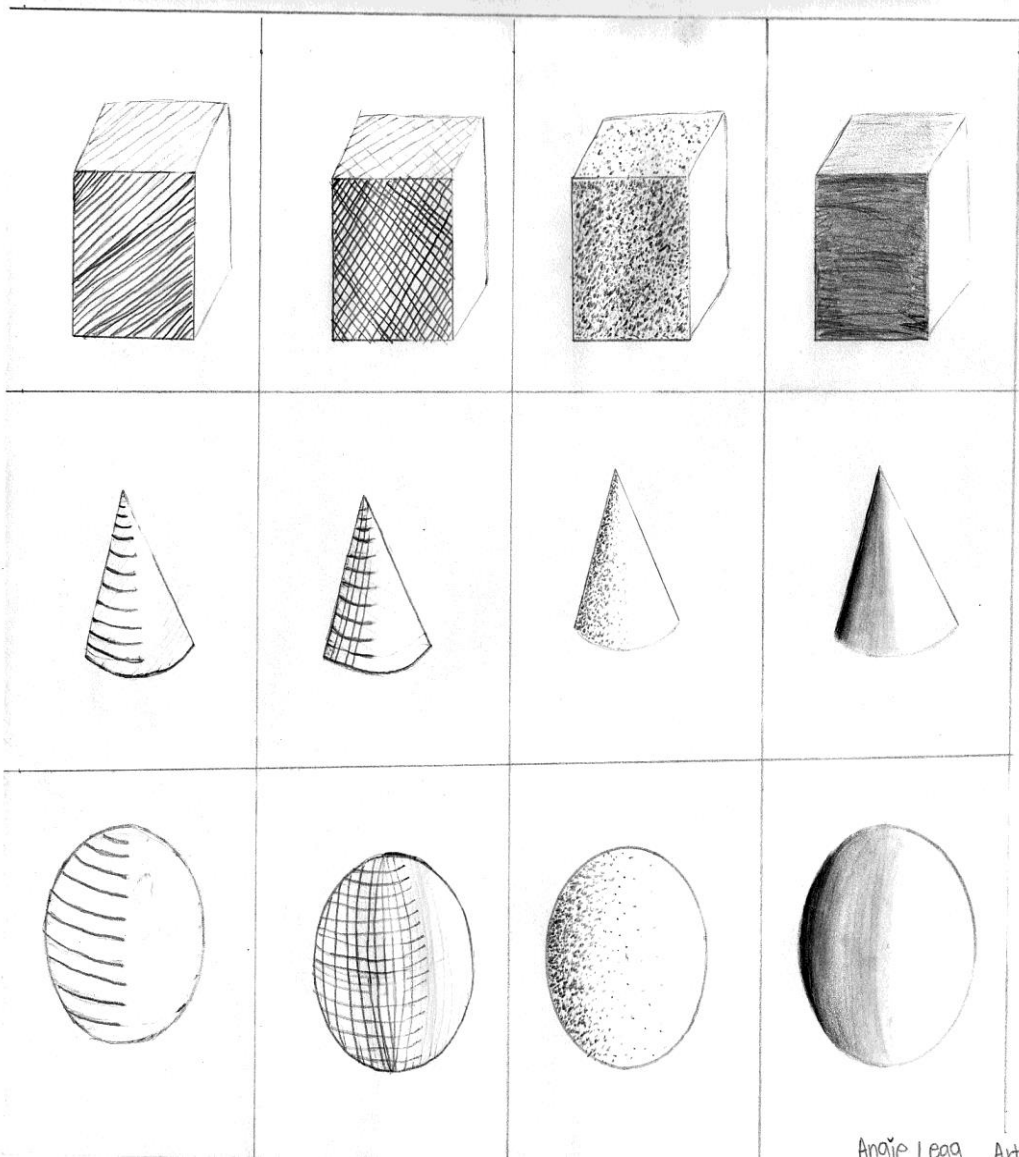

This week I want you to practice your shading. Spend a lesson practicing different types of shading.

After you have practiced, pick something in your house that you want to practice shading and draw a best copy.

Once you have finished, send it in to the class email (sycamoreclass2020@hotmail.com) and I will upload them onto the schools website for you all to see.

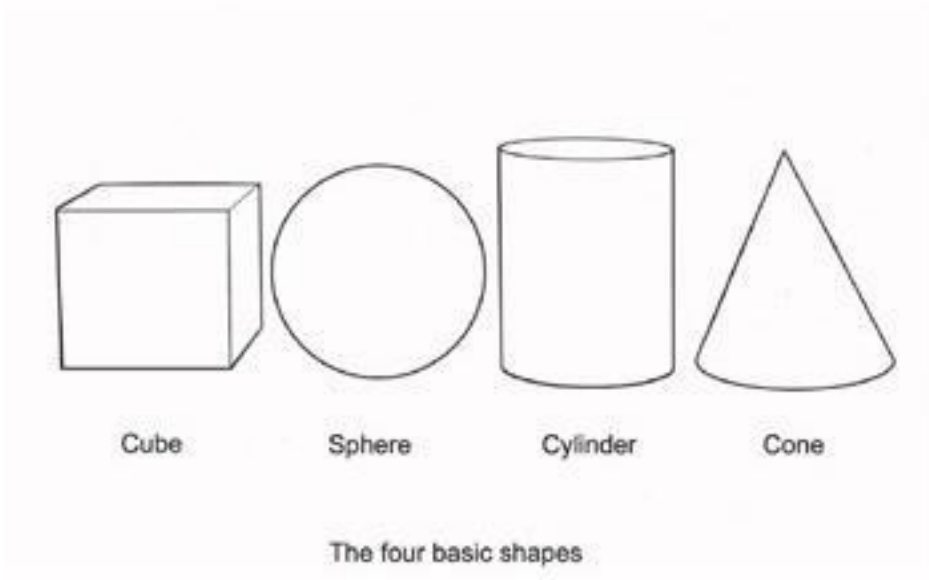

What it is and How YOU can do it.

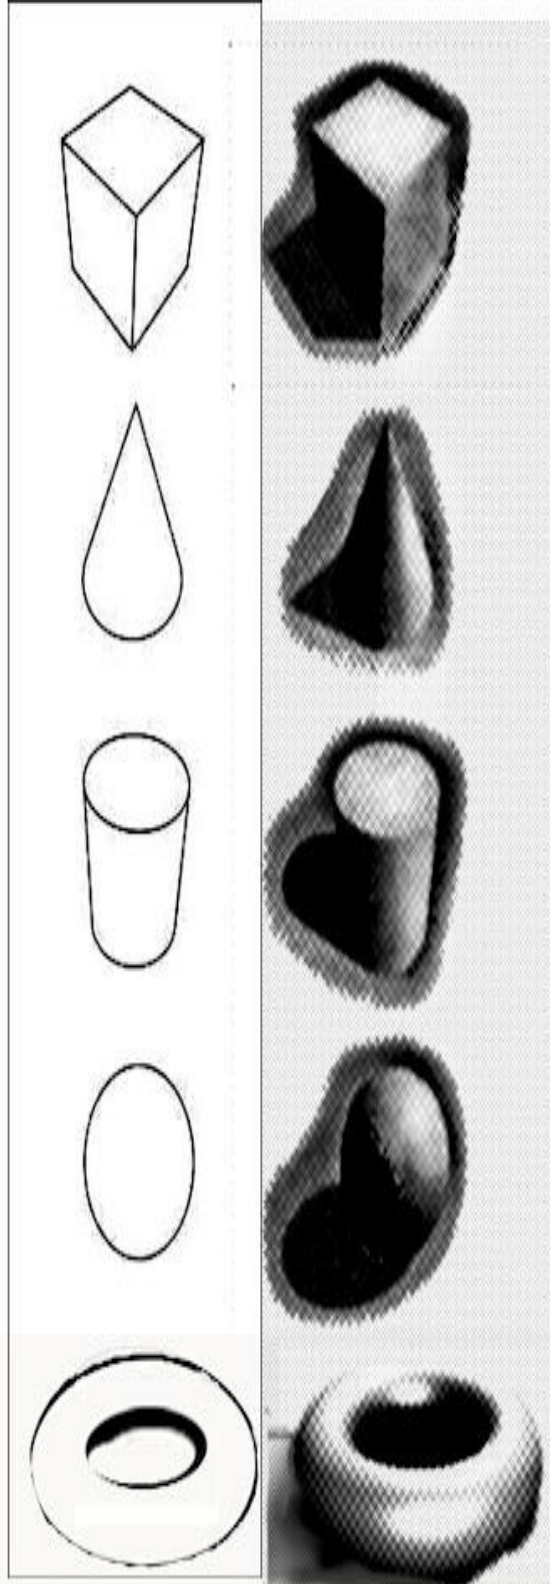

André 1 paa Art / Rnh 3/4

1. Draw and shade exactly what you SEE, nothing more, nothing less.
2. Use directional shading. Follow the form of the object you are shading. Curved lines for rounded objects and straight lines for flat objects.
3. NO OUTLINES!! Edges should be created where two values meet.

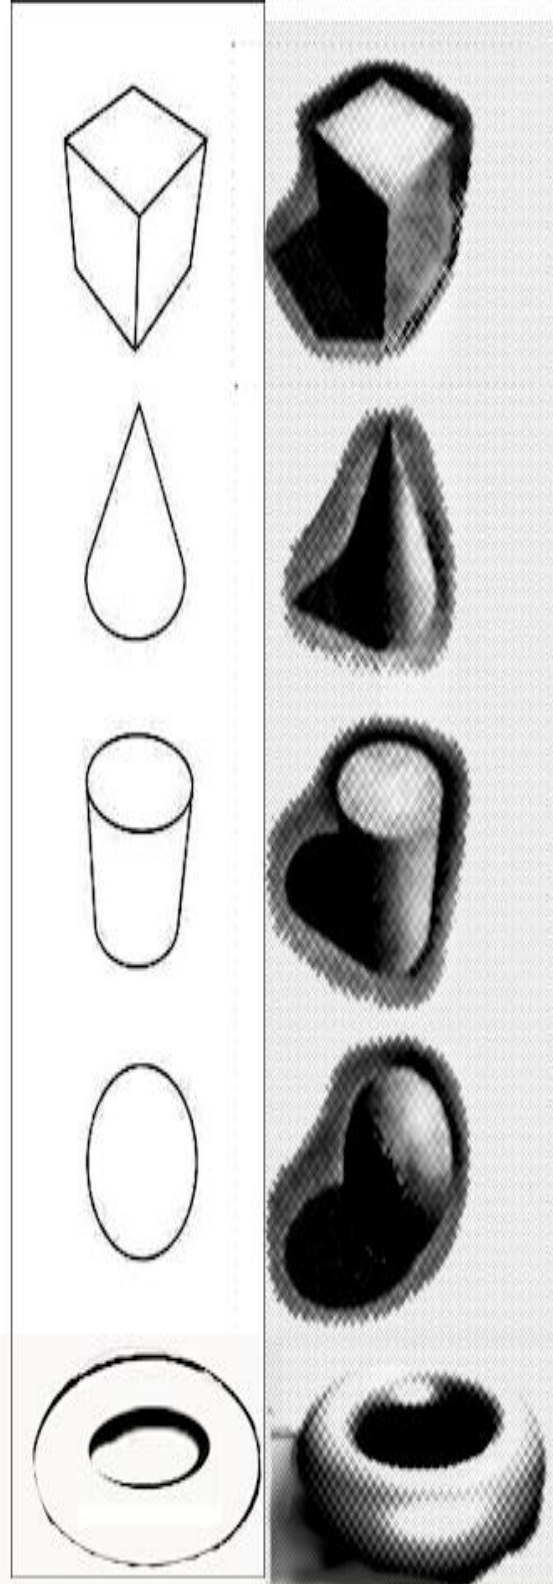

Use an HB, 6B and 2B pencil and a blending stomp to make the forms on the left look like the forms on the right. Color carefully.

If you need another worksheet you may print one at thehelpfulartteacher.blogspot.com under the post Drawing the five basic three-dimensional forms: Still life 101
